

Marine Renewables Canada Media Kit

Marine Renewables Canada (MRC) is the only national industry association advancing offshore wind, tidal, wave, and river current energy.

We support the marine renewable energy sector's growth through advocacy, supply chain development, events, international business development, and education - bringing together the companies, researchers, governments, and communities shaping Canada's marine energy future.

Our expertise

- Offshore wind
- Tidal energy
- Wave energy
- River current energy
- Marine renewable energy markets
- Supply chains and economic development
- Environmental research and marine planning
- Indigenous partnerships and community engagement
- Energy policy and regulation
- Canada's clean electricity future
